SUMMARY

Frontend Developer with 6.5 years of experience in UI development, including 3 years of professional React.js development. Builds responsive, reusable interfaces from Figma designs using React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS and component libraries such as shadcn/ui and Ant Design. Moved from UI/UX design into frontend engineering. Uses Cursor and GitHub Copilot to speed up implementation, and reviews and tests all generated code before merging.

TECHNICAL SKILLS

Frontend: React.js (Hooks, Context API, React Router), Next.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design
UI Libraries & Styling: Tailwind CSS, shadcn/ui, Ant Design, Bootstrap
Data Visualization: Recharts
Generative AI & LLMs: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, Embeddings, Vector Search, AI API Integration
AI Automation & Workflows: n8n, AI Workflow Automation, API Integrations
Tools: Git, GitHub, Vite, npm, VS Code, Chrome DevTools
Design: Figma, Wireframing, Prototyping, Design Systems
AI-Assisted Development: Cursor, GitHub Copilot, Claude, Google Stitch
Currently Learning: Python, FastAPI, REST APIs, Vector Databases, RAG Pipelines

PROFESSIONAL EXPERIENCE

Amzur Infotech Pvt. Ltd. | Visakhapatnam, Andhara Pradesh | Feb 2020 – Present

UI Developer | Apr 2023 – Present

- Built and maintained reusable React.js components, forms, tables, dashboards, navigation elements, and modals using JavaScript, HTML5, CSS3, and modern UI libraries such as Ant Design and shadcn/ui.
- Fixed UI defects, cross-browser issues, and responsive layout problems during application development.
- Used Git and GitHub for version control, pull requests, and code reviews with Agile/Scrum teams.
- Leveraged Cursor and GitHub Copilot to accelerate React.js component development, generate implementation ideas, refactor code, and troubleshoot errors; reviewed and tested AI-generated code before integration to ensure functionality and maintainability.

UI/UX Design and UI Development | Feb 2020 – Mar 2023

- Created UI designs, wireframes, prototypes, and responsive layouts using Figma.
- Translated design requirements into web interfaces using HTML5, CSS3, and modern styling frameworks.
- Developed page layouts and UI elements while maintaining visual consistency and usability.
- Collaborated with stakeholders and developers to clarify design requirements and support design-to-development handoff.
- Refined existing interfaces based on design feedback, usability requirements, and browser compatibility needs.

PROJECTS

RevUp Lead Tracker | Full-Stack Sales CRM

Type: Professional Project

Tech: Next.js, React, Tailwind CSS, Node.js, Express, FastAPI, MySQL, SQLAlchemy, JWT, Google APIs, Gemini, Cloudinary

- Developed CRM interfaces for managing leads, deals, contacts, and companies, including dashboards, sales funnels, calendar views, and global search.
- Implemented workflows for CSV imports, Google Drive documents, and PDF/Excel exports.
- Integrated Google Workspace services, including OAuth, Calendar, Drive, Directory, and Gmail.
- Contributed to AI-powered sentiment analysis and task detection using Gemini and Python-based services.
- Worked with authentication, role-based access control, and permission management.

Amzur AI Chat | Full-Stack AI Chat Application

Type: AI Forge Training Project

Tech: React 18, TypeScript, Vite, Tailwind CSS, FastAPI, Python, PostgreSQL, Supabase, SQLAlchemy, LangChain, Gemini, LiteLLM, ChromaDB, Pandas, n8n

- Built a full-stack AI chat application with threaded conversations, streaming responses, conversation history, and authentication.
- Implemented multimodal chat supporting images, video, PDFs, Excel files, code, and formulas, with server-side MIME validation.
- Integrated PDF-based retrieval-augmented generation (RAG) using ChromaDB and embeddings.
- Developed natural-language database querying with read-only SQL generation and safeguards against destructive operations.
- Implemented CSV, Excel, and Google Sheets analysis workflows using Pandas-based agents, LiteLLM, and n8n.

Internal Knowledge Base Navigator | RAG Application

Type: AI Forge Training Project

Tech: Python, FastAPI, Streamlit, LangChain LCEL, ChromaDB, Gemini 2.5 Flash, LiteLLM, OpenAI Embeddings, pytest, HTTPX

- Built a conversational RAG application for answering employee questions from company policy documents.
- Designed a retrieval pipeline covering intent classification, query rewriting, semantic search, grounded generation, and source linking.
- Implemented ChromaDB vector search and text-embedding-3-large through LiteLLM.
- Developed typed FastAPI endpoints with path-traversal protection and environment-based configuration.
- Created 15 unit and integration tests using pytest, with mocked LLM and vector-store calls.

NovaCRM | Customer Relationship Management Dashboard

Type: Personal Project — In Progress

Tech: Next.js, React, JavaScript, Tailwind CSS, shadcn/ui, Supabase, REST API Integration

- Developing a full-stack CRM application for managing customer relationships and sales workflows through a responsive, modern interface.
- Building reusable React components and structured application layouts using Next.js, Tailwind CSS, and shadcn/ui.
- Integrating backend APIs to connect frontend workflows with application data and business logic.
- Implementing Supabase authentication and database integration for user access and data management.
- Developing and testing API-connected features, handling application states, and troubleshooting integration issues.
- Using Cursor and GitHub Copilot to assist with implementation, refactoring, debugging, and code quality improvements.

EDUCATION

Bachelor of Technology (B.Tech) – Electronics and Communication Engineering (ECE)

Malla Reddy Institute of Technology **2014 – 2018**

CERTIFICATIONS & TRAINING

- **AI Agent Development Workshop** — Frontlines Edutech
  Participated in the “Build Your First AI Agent App” workshop.
- **AI Tools & ChatGPT Workshop** — be10x
  Completed July 2025.
- **AI Forge Capstone Project** — Amzur
  Successfully completed the AI learning program and capstone project, June 2026.
- **UI & UX Assessment** — LearnTube by CareerNinja
  Completed September 2024.
